**WELCOME TO THE
NORTHERN ROCKIES COORDINATION CENTER**

Monday, May 21, 2007

The **Northern Rockies Coordination Center (NRCC)** is the interagency focal point for coordinating the mobilization of resources for wildland fire, wildland fire use, prescribed fire and other all-hazard incidents throughout the Northern Rockies Area and, when necessary, for assignment throughout the United States. Located in Missoula, Montana, the Center also provides Intelligence and Predictive Services related-products to support wildland fire managers and firefighters in the decision making process throughout the Northern Rockies.

There are five primary components to the NRCC website.

- The [Incident Information](#) is designed to provide the general public with daily updates on large fires, fire restrictions, and other activity throughout the Northern Rockies Area.
- The [Predictive Services](#) component provides operational products and links to incident situation
